II -1 Full-Year Financial Results Forecast

Both net sales and profit forecasts were revised upward.

Unit: JPY million

	Original Forecast	Revised Forecast	Change	Percentage Change	2Q FY2026 Actual	Progress vs. Original Forecast	Progress vs. Revised Forecast
Net sales	175,600	190,500	14,900	8.5%	88,862	50.6%	46.6%
Operating profit	7,600	9,300	1,700	22.4%	5,819	76.6%	62.6%
Ordinary profit	7,800	9,600	1,800	23.1%	6,074	77.9%	63.3%
Profit attributable to owners of parent	5,000	6,400	1,400	28.0%	4,380	87.6%	68.4%

As of the second quarter, net sales had reached 50.6% of the original forecast, while each profit category achieved progress of approximately 80%.

Looking ahead, net sales are expected to exceed the original forecast, supported by the steady progress of construction projects, particularly large-scale private-sector building construction projects. Profit is also expected to increase due to the maintenance of safety and quality standards, steady progress of construction projects, and a reduction in unprofitable projects.

Based on these factors, the Company has revised upward both its net sales and profit forecasts.

(Note) Please refer to Page 9 for Fukuda Corporation's non-consolidated second-quarter orders received and orders forecast.

II-2 Dividends / Shareholder Returns

Annual dividend forecast: ¥140 per share

Basic dividend increased

(Note) The Company conducted a stock split at a ratio of two shares of common stock for each share held, with an effective date of July 1, 2026. Therefore, the forecast year-end dividend of ¥140 per share for the fiscal year ending December 2026 is equivalent to ¥280 per share on a pre-stock-split basis.

ROE is expected to increase from the 6% range to the 7% range. The Company has also raised its basic dividend and plans to increase the year-end dividend by ¥10 per share from the original forecast to ¥140 per share. The dividend payout ratio is expected to remain in the 30% range.

II - 3 Orders Forecast

No change from the original forecast.

Unit: JPY million

	Original Forecast	Revised Forecast	Change	Percentage Change	2Q FY2026 Actual	Progress vs. Original Forecast

Non-Consolidated	100,400	100,400	—	0%	52,482	52.3%

Although orders received as of the second quarter decreased year on year, they have progressed steadily in line with the original forecast. However, shortages of engineers and labor continue to be a challenge, and growth in orders during the second half remains uncertain. Accordingly, the forecast has been left unchanged.
